For the purpose of this calculation, share purchase warrants held by Elysee were valued using the Black-Scholes model calculation, as reported in our annual and quarterly financial statements. The term NAV does not have any standardized meaning according to GAAP and therefore may not be comparable to similar measures presented by other companies. There is no comparable GAAP measure presented in Elysee's financial statements and thus no applicable quantitative reconciliation for such non-GAAP financial measure. The Company believes that NAV can provide information useful to its shareholders in understanding its performance, and may assist in the evaluation of its business relative to that of its peers.
